DRIVER ANALYSIS - TEAMBOSS 300 (Drivers 1-5 of 46)

Jeff J. Wright

+300

S6: P7 | 332 pts | 3W

Jeff Wright enters the TeamBoss 300 as the clear favorite based on the most dominant intermediate track resume in SNR Cup Series history. He has accumulated 18 wins on intermediate ovals across all SNR seasons, posting a staggering 32% win rate in 56 starts - no other driver is close. His average finish of 7.4 on intermediates is the best in the entire field. At Charlotte specifically, Wright led 82 laps in Season 1 - more than any other driver - before a late-race misfortune dropped him to P4. He returned to Charlotte S4 and finished P2. Currently 7th in S6 points with 3 wins this season, Wright comes in with momentum and unmatched track-type expertise. The 1.5-mile Charlotte oval sets up perfectly for his driving style, and his historical edge over the field here is simply too large to ignore at +300.

A.J. Stravato

+400

S6: P1 | 423 pts | 3W

A.J. Stravato leads the Season 6 championship standings with 423 points and 3 wins, making him the hottest driver in the series right now. He enters Charlotte having won at Rockingham, Texas, and Dover this season - a remarkable run of form. At Charlotte specifically, Stravato demonstrated elite pace in Season 4, leading 52 laps before ultimately finishing P9 - the result understated his speed that day. He has 4 career intermediate wins in SNR with an average finish of 12.0 on that track type. Points leader momentum, current form, and Charlotte pace history all point to Stravato being a genuine threat to win the TeamBoss 300. At +400 he is nearly co-favorite with Wright and represents the second-best ticket on the board.

Bailey Turner

+500

S6: P2 | 403 pts | 2W

Bailey Turner sits 2nd in the S6 championship standings with 403 points and 2 wins this season. He is the second-best intermediate track performer in SNR history with 8 career wins on 1.5-mile ovals and a 7.9 average finish - trailing only Jeff Wright in both categories. Turner finished P3 at Charlotte Season 1 and has consistently shown speed on intermediate tracks throughout his SNR career. He enters Memorial Day Weekend in championship contention and will be motivated to take points away from rival Stravato. With the kind of intermediate pedigree Turner carries, +500 represents solid value for a driver who wins at this track type more than almost anyone in the field.

Adam Cabot

+600

S6: P22 | 209 pts | 0W

Adam Cabot's intermediate track numbers are elite. He has 5 wins on 1.5-mile ovals in SNR with a 7.7 average finish - the second-best average finish among all drivers researched, behind only Jeff Wright. He finished P8 at Charlotte Season 1 and has shown the raw pace to compete at the front on this track type. The caveat is limited Season 6 activity - Cabot has only 6 starts this season - but when he shows up, he wins. Two SNR Dover wins demonstrate he can master high-commitment tracks that demand precision, and Charlotte's smooth 1.5-mile surface plays to similar strengths. At +600, Cabot offers premium intermediate value.

Seth Hatchel

+700

S6: P5 | 369 pts | 0W

Seth Hatchel has flown under the radar at Charlotte but his numbers tell a compelling story. He led 34 laps at Charlotte Season 5 before finishing P5 - the second-most laps led in that race by any current S6 driver. Hatchel is 5th in the S6 championship standings with 369 points across 10 starts and has 1 career SNR intermediate win. His average finish of 10.1 on intermediates shows consistent front-running capability. At +700, Hatchel is a high-value play for a driver who has shown he can lead laps and run near the front at Charlotte Motor Speedway specifically.

DRIVER ANALYSIS - TEAMBOSS 300 (Drivers 6-10 of 46)

J R Shepherd**+800**

S6: P4 | 372 pts | 0W

J R Shepherd sits 4th in the S6 championship with 372 points, one of the most consistent performers all season. He finished P6 at Charlotte Season 5 and has 1 career SNR intermediate win with an average finish of 12.3 across 32 intermediate starts. Shepherd has been a model of consistency throughout Season 6 - rarely spectacular but almost never far from the top 10. On a 200-lap intermediate event like the TeamBoss 300, reliability and consistency can carry a driver to victory lane. At +800, Shepherd offers solid value for a championship contender with proven Charlotte experience.

Joshua Banks**+900**

S6: P8 | 330 pts | 1W

Joshua Banks may be the most underrated Charlotte specialist in the entire field. He has two Charlotte podiums - P2 in Season 1 and P2 again in Season 5 - making him the most consistently strong Charlotte finisher among active S6 drivers. Banks has 7 career SNR intermediate wins and is 8th in S6 points with 1 win this season. Every time the SNR Cup Series has visited Charlotte, Joshua Banks has been on the podium. Track-specific history is one of the three pillars of this odds model, and no one in the field has a better Charlotte record than Banks. At +900, he represents perhaps the best pure value on the entire board.

Phillip Brewer**+1000**

S6: P6 | 354 pts | 0W

Phillip Brewer is 6th in the S6 championship standings with 354 points across 11 starts, one of the most consistent season-long performers in the field. He has 3 career SNR intermediate wins and brings steady top-10 capability to the 1.5-mile oval. It is important to note that Brewer's short track success has come predominantly in the Challenger Series, not the SNR Cup Series. On intermediate tracks, his Cup Series numbers are more modest with a 14.6 average finish, suggesting more upside remains unlocked. However, his championship points position and consistent race-day execution make him a legitimate threat in a long 200-lap event. At +1000, reasonable value.

Kenny Kibbey**+1200**

S6: P3 | 399 pts | 0W

Kenny Kibbey sits 3rd in the S6 championship standings with 399 points - remarkably just 24 points behind leader Stravato despite zero wins this season. He has 30 career intermediate starts in SNR without a win, but his average finish of 11.3 on that track type shows he routinely runs in the top half of the field. Kibbey's strength is consistency - he rarely has catastrophic races, accumulates points efficiently, and stays out of trouble. In a 200-lap race where attrition can play a major role, Kibbey's clean-running style could be worth more than his lack of intermediate wins suggests. The championship is also on the line, adding motivation to deliver a strong result on Memorial Day Weekend.

Chad Clinger**+1300**

S6: P31 | 166 pts | 0W

Chad Clinger is a fascinating boom-or-bust intermediate racer. He has 3 career SNR intermediate wins but pairs them with a 17.4 average finish - suggesting he either runs near the front or has an incident. There is little middle ground. He finished P7 at Charlotte Season 4 and showed he can compete at this specific track. Currently 31st in S6 points with a difficult season, Clinger would benefit enormously from a strong Charlotte run. At +1300, he is a volatile but plausible upset pick for bettors who understand his high-variance driving style.

DRIVER ANALYSIS - TEAMBOSS 300 (Drivers 11-15 of 46)

Reggie Ortega**+1400**

S6: P32 | 163 pts | 0W

Reggie Ortega quietly delivered one of the best individual Charlotte results among current S6 drivers. He finished P4 at Charlotte Season 5 - a result that gets overlooked given his modest S6 standings position (32nd, 163 points). Ortega's overall season has been inconsistent, but his Charlotte-specific pace is real. If the TeamBoss 300 sets up with late-race chaos or a green-white-checked finish, Ortega has proven he can be in position to capitalize. At +1400, his track-specific history makes him an intriguing longshot play with genuine Charlotte credentials.

Ryan Carwile**+1500**

S6: P27 | 188 pts | 0W

Ryan Carwile finished P5 at Charlotte Season 4 and has 2 career SNR intermediate wins with a 12.7 average finish across 52 intermediate starts. Currently 27th in S6 points with 8 starts, Carwile has the experience base to run competitively at Charlotte. He is not a frontrunner in the current season standings, but his Charlotte track record and intermediate experience give him a realistic floor for this event. At +1500, a solid mid-tier play with genuine track history backing it up.

Enathian Ferrada**+1800**

S6: P20 | 223 pts | 0W

Enathian Ferrada is the defending Charlotte winner, having taken the Season 5 race with a brilliant late-race pass leading just 1 lap. That result - winning by being in the right place at the right time - speaks to his race craft and situational awareness at Charlotte Motor Speedway. Currently 20th in S6 points across 9 starts, Ferrada has not been a regular frontrunner this season, but his Charlotte-specific win cannot be ignored. Defending track winners at familiar venues carry real weight in this model. At +1800, his Charlotte credentials give him clear value above his season-long form might suggest.

Rhea Massey**+2000**

S6: P27 | 188 pts | 0W

Rhea Massey has quietly been one of the most consistent Charlotte performers in SNR history. He finished P7 at Charlotte Season 1 and P8 at Charlotte Season 4 - two Charlotte top-10s that suggest a genuine affinity for this specific track. Currently tied for 27th in S6 points with 10 starts, Massey's season results have been modest, but his Charlotte track record is better than his odds imply. At +2000, Massey offers value for bettors looking for a driver with proven Charlotte history at longer odds.

Angelo Hronis**+2200**

S6: P12 | 290 pts | 0W

Angelo Hronis delivered a P3 podium finish at Charlotte Season 4, one of the stronger individual Charlotte results on record for a current S6 driver. He is 12th in S6 points with 290 points across 10 starts and has shown consistent top-15 form all season. His Charlotte podium is a legitimate data point, and his intermediate experience gives him a realistic shot at a strong finish in the TeamBoss 300. At +2200, Hronis represents reasonable value for a driver with a proven Charlotte podium on his resume.

DRIVER ANALYSIS - TEAMBOSS 300 (Drivers 16-20 of 46)

Dakota Floyd2**+2500**

S6: P13 | 259 pts | 0W

Dakota Floyd2 is 13th in S6 championship points with 259 points and finished P10 at Charlotte Season 4 - showing intermediate track capability. He has 2 Challenger Series short track wins but is still building his Cup Series intermediate resume. Dakota is just inside the Chase cutline entering Race 12 and will be motivated to extend his points advantage. At +2500, he is a mid-tier play with championship motivation and a Charlotte appearance on his record.

Elliott Butler**+3000**

S6: P11 | 304 pts | 0W

Elliott Butler has been one of the quiet performers of Season 6, sitting 11th in points with 304 points across 11 starts. He has no Charlotte Cup Series history to draw from directly, but his consistent season-long form suggests he is capable of delivering in any race environment. At +3000, Butler is purely a points-based value play - backed by his S6 consistency more than any track-specific history.

Andy Telgenhof**+3200**

S6: P21 | 221 pts | 2W

Andy Telgenhof has made the most of limited opportunities in Season 6, posting 2 wins in just 6 starts and sitting 21st in points. He has 1 career SNR intermediate win and a 16.7 average finish on that track type. The small sample size makes Telgenhof difficult to fully evaluate at Charlotte, but his ability to win races when he shows up is undeniable. At +3200, he is a high-variance play with proven race-winning capability.

Caleb Weekley**+3500**

S6: P9 | 311 pts | 0W

Caleb Weekley is 9th in Season 6 standings with 311 points across 11 starts - a consistent presence throughout the campaign. Limited Charlotte and intermediate track history means his odds are driven primarily by his S6 form rather than track-specific data. At +3500, Weekley is a solid mid-field play for bettors focused on season-long consistency.

Justin Richie**+3500**

S6: P10 | 310 pts | 0W

Justin Richie sits 10th in S6 points with 310 points across 11 starts, one of the most reliable mid-pack performers all season. No Charlotte or intermediate win history to draw from, but Richie's consistent season-long execution gives him a realistic floor. At +3500, he shares odds with Weekley - both driven primarily by championship position rather than track-specific history.

DRIVER ANALYSIS - TEAMBOSS 300 (Drivers 21-25 of 46)

Noah Michalski**+4500**

S6: P27 | 188 pts | 0W

Noah Michalski is tied for 27th in S6 points with 188 points across 7 starts. Limited data at this track type but has shown competitive pace when in the car this season. At +4500, a deep longshot play with limited Charlotte history.

Casey Lakatos**+4500**

S6: P17 | 230 pts | 0W

Casey Lakatos is 17th in S6 points with 230 points across 11 starts - one of the most regular starters in the field. Consistent mid-pack presence all season. At +4500, backed by season consistency rather than track-specific upside.

Chuck Sweeting**+5000**

S6: P14 | 256 pts | 0W

Chuck Sweeting is 14th in S6 points with 256 points across 11 starts. He has 1 Challenger Series short track win but no Cup Series intermediate wins. At +5000, a deep longshot with the consistency to complete 200 laps but limited win-type upside on an intermediate track.

Bryce Shoemaker**+5000**

S6: P18 | 227 pts | 0W

Bryce Shoemaker is 18th in S6 points with 227 points across 10 starts. He has 1 Challenger Series short track win but no Cup Series intermediate history. At +5000, a deep field play backed by modest S6 consistency.

Austin Boelke**+5500**

S6: P19 | 224 pts | 0W

Austin Boelke is 19th in S6 points with 224 points across 10 starts. He has 1 Challenger Series short track win but his intermediate Cup Series history is limited. At +5500, a deep longshot entry.

DRIVER ANALYSIS - TEAMBOSS 300 (Drivers 26-30 of 46)

Max Kost**+5500**

S6: P16 | 236 pts | 0W

Max Kost is 16th in S6 points with 236 points across 11 starts. One of the most consistent mid-pack starters in the field. No intermediate wins but steady season execution. At +5500, a deep field play with reliable race completion history.

Brandon Wallace**+6000**

S6: P23 | 208 pts | 0W

Brandon Wallace is 23rd in S6 points with 208 points across 11 starts. One of the most frequent starters in Season 6. Limited upside on an intermediate track but dependable for race completion. At +6000, a deep longshot.

Christopher Hodges**+6000**

S6: P15 | 244 pts | 0W

Christopher Hodges is 15th in S6 points with 244 points across 11 starts. Consistent mid-pack presence throughout Season 6. No specific Charlotte history available. At +6000, a deep field entry backed by S6 consistency.

Kyle Peacock**+6000**

S6: P44 | 74 pts | 0W

Kyle Peacock is 44th in S6 points with 74 points across 3 starts. Limited Season 6 participation means limited data. At +6000, a highly speculative play.

Ben Laughter**+6500**

S6: P25 | 201 pts | 0W

Ben Laughter is 25th in S6 points with 201 points across 11 starts. One of the most consistent starters in the field with solid race completion history. At +6500, a deep field play.

DRIVER ANALYSIS - TEAMBOSS 300 (Drivers 31-35 of 46)

Stefan Davis	+7000	S6: P24 205 pts 0W
Stefan Davis is 24th in S6 points with 205 points across 10 starts. Regular competitor throughout Season 6. At +7000, a deep longshot.		
Matt Shinoski	+7000	S6: P26 196 pts 0W
Matt Shinoski is 26th in S6 points with 196 points across 9 starts. Consistent mid-season performer. At +7000, a deep field entry.		
Rob Hamp	+7000	S6: P30 171 pts 0W
Rob Hamp is 30th in S6 points with 171 points across 9 starts. Regular competitor with no major Charlotte or intermediate track history. At +7000, a deep longshot.		
Broderick Vaclavik	+7500	S6: P34 160 pts 0W
Broderick Vaclavik is 34th in S6 points with 160 points across 9 starts. Consistent field presence without major results this season. At +7500, a deep field play.		
Brian Chambliss	+8000	S6: P35 143 pts 0W
Brian Chambliss is 35th in S6 points with 143 points across 8 starts. At +8000, a deep longshot entry with limited S6 results.		

DRIVER ANALYSIS - TEAMBOSS 300 (Drivers 36-40 of 46)

Keith Shoemaker**+8000**

S6: P36 | 136 pts | 0W

Keith Shoemaker is 36th in S6 points with 136 points across 9 starts. At +8000, a deep field entry.

Eldon Stewart2**+8500**

S6: P38 | 101 pts | 0W

Eldon Stewart2 is 38th in S6 points with 101 points across 9 starts. At +8500, a deep longshot with limited recent impact.

Logan Threlkeld**+8500**

S6: P48 | 26 pts | 0W

Logan Threlkeld is 48th in S6 points with 26 points across 3 starts. Very limited Season 6 participation. At +8500, a highly speculative entry.

Mikal Jones**+8500**

S6: P33 | 162 pts | 0W

Mikal Jones is 33rd in S6 points with 162 points across 10 starts. Regular competitor without major intermediate track results. At +8500, a deep field play.

Tim Shinoski**+9000**

S6: P37 | 134 pts | 0W

Tim Shinoski is 37th in S6 points with 134 points across 8 starts. At +9000, a deep longshot entry.

DRIVER ANALYSIS - TEAMBOSS 300 (Drivers 41-45 of 46)

James Lehman	+9000	S6: P40 93 pts 0W
James Lehman is 40th in S6 points with 93 points across 7 starts. At +9000, a deep field play with limited S6 activity.		
Bryan Dehn	+9000	S6: P41 89 pts 0W
Bryan Dehn is 41st in S6 points with 89 points across 4 starts. Very limited Season 6 activity. At +9000, a deep longshot.		
Justin Carey2	+9000	S6: P39 100 pts 0W
Justin Carey2 is 39th in S6 points with 100 points across 5 starts. Limited Season 6 participation. At +9000, a highly speculative entry.		
John Seniw	+9500	S6: P43 82 pts 0W
John Seniw is 43rd in S6 points with 82 points across 8 starts. At +9500, a deep field longshot with limited results this season.		
Derek M Garrison	+9500	S6: P45 61 pts 0W
Derek M Garrison is 45th in S6 points with 61 points across 2 starts. Extremely limited Season 6 data. At +9500, a highly speculative play.		

DRIVER ANALYSIS - TEAMBOSS 300 (Drivers 46-46 of 46)

Mark McFadyen

+10000

S6: P42 | 83 pts | 0W

Mark McFadyen is 42nd in S6 points with 83 points across 7 starts. At +10000, the longest odds in the field - a deep field longshot entry.
